

Use your HSBC card with Apple Pay

Video Transcript

Adding your HSBC card to Apple Pay is simple.

Head to the Wallet App on your device. If you haven't registered your card on iTunes, you need to add your details as a new card.

Tap next. You can either input your details manually or take a quick picture of your card. If your card is registered to your iTunes account, you can skip straight to this stage.

Type in your security code. You will find this on the back of your card and tap next.

Read and review the Terms and Conditions and once you are happy, tap agree. You are almost there.

Next step, you need to verify your card.

You can do this via email or text message.

Once you've received your email or text with the code, type in your code, click next.

That's it. You're ready to use Apple Pay with your HSBC card.
