

## HSBC Channel Islands and Isle of Man International Investment Video Transcript

With our new International Investment Centre, it's so much easier to make your investment decisions...

...all in one place, at any time that suits you. Start today because every day adds up.

Signing up is quick and easy – simply log on to your online banking.

You'll be able to create, build and review your investment portfolio anytime.

It doesn't matter if you're investing for the first time with HSBC, or you're a seasoned investor. With our regular savings option you can start from as little as £50 per month

and have a choice of hundreds of mutual funds from globally recognised providers.

Shall we get started?

Head to the investing section of your online banking, and then go to Open Account.

Next, select the type of account you'd like to open, this can be a joint or sole account, or you can have both.

Once you're set up, you can use the Discover Funds tab to search hundreds of funds, see their ratings and even apply filters.

Here, you can compare fund performance, holdings and more,

...all in one place.

Whether you want to buy, sell or set up a regular savings plan, there's a simple three-step process to place your order.

After you've completed your order, it'll appear on the Order Status tab straight away, so you can keep an eye on it.

You can always find a full breakdown of your funds, including the current performance and valuations. To see this just go to your wealth dashboard and click in My Holdings tab in your Account Summary section.

Once you have opened your account, you can begin your investment journey. Check out the wealth section on our website.

Would you prefer to speak to someone in person? Call us to book an appointment with one of our wealth managers who can guide you through.

We're always here to make investing easier for you.

HSBC International Investment Centre. Your home for investing, where it all adds up.

Remember, the value of investments is not guaranteed - you may not get back the amount you invested, and any income received from them can fall as well as rise. This could also result from changes in currency exchange rates, particularly where overseas securities are held or where investments are converted from one currency to another. We always recommend that any investments should be considered as medium to long-term holdings of least 5 years.
